Deloitte Search Term Assistant

Reviewing privilege documents

Finding the right documents - Identifying documents for discovery is often a convoluted task. A part of the process is identifying search terms. Parties often resort to an “educated guess” approach when choosing and agreeing to terms that they deem beneficial in identifying documents for discovery. Many organizations underestimate the power and significance of creating a compelling and precise set of highly relevant search terms through accurate statistical validation.

Efficient review integration - The Deloitte Search Term Assistant tool integrates with the suite of tools built on Relativity’s eDiscovery platform. The tool reviews the syntax of keyword search terms that are to be executed in Relativity or a processing tool.

Save time and cost - Let Deloitte Search Term Assistant review your search term syntax and reduce the cost of human review. This may reduce the time required for reviewing search term syntax and thus the cost.

The Assistant – Deloitte Search Term Assistant technology is a “first pass” tool designed to help reduce the time and expense of discovery by helping to analyze search term syntax, thus reducing the reviewer workload.

Deloitte Search Term Assistant

Potential benefits

Relativity Integration

Work with both on-premise and RelativityOne platforms. Results can be batch reviewed inline with other documents, providing better context to a family of documents.

Expedited Workflow

Spend less time reviewing and troubleshooting incorrect search term syntax. Quickly identify search terms with syntax issues. Review useful errors and warnings flag to assist with resolving identified issues.

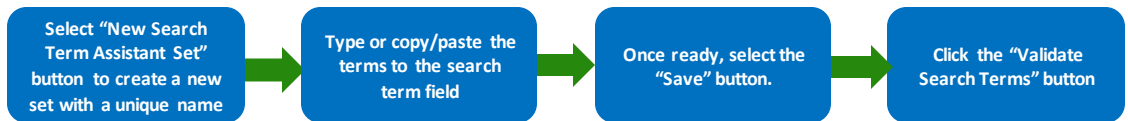

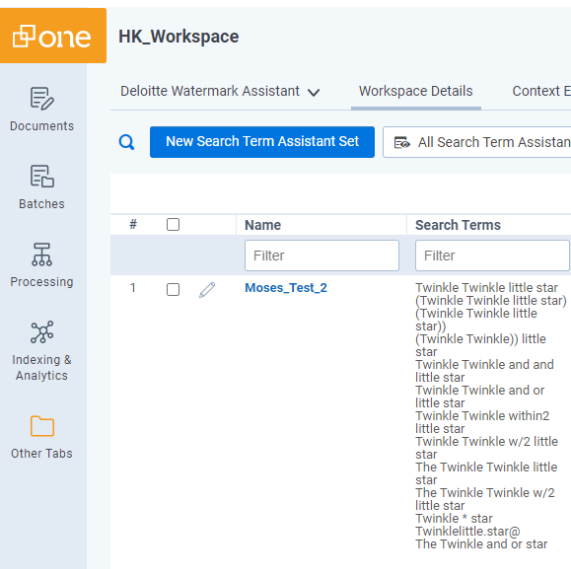

Potential Savings

Reduce the cost of human search term review. Quickly identify noise words which could inflate document review population.

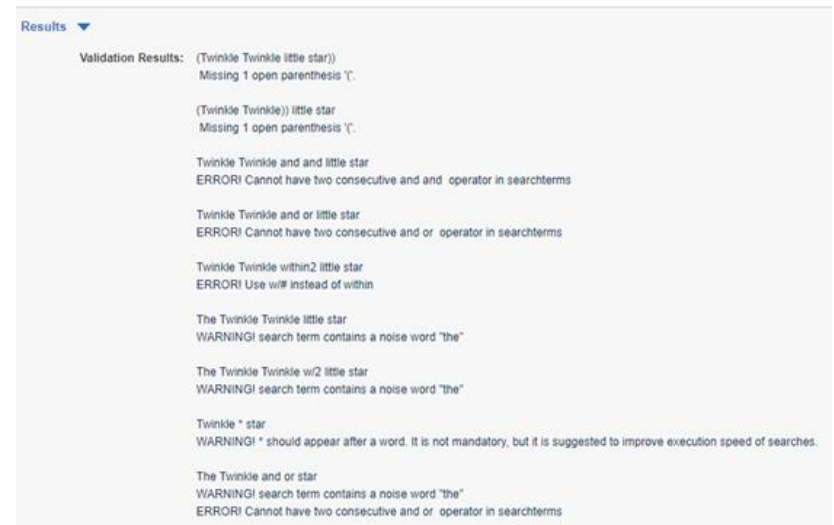

Deloitte Search Term Assistant Workflow

How it works - The application is accessed via the “Search Term Assistant” application option within the Workspace. The application must be installed for each Workspace.

A user will select “New Search Term Assistant Set” button to create a new set with a unique name. Type or copy/paste the terms to the search term field. Once ready, select the “Save” button. Click the “Validate Search Terms” button and wait for the results.

The Results - Once the Validation is complete, the results will appear in the Validation Results field. The results will provide the user with error or warning descriptions. To make any adjustments, the user can simply press the “Edit” button to revise the terms.
