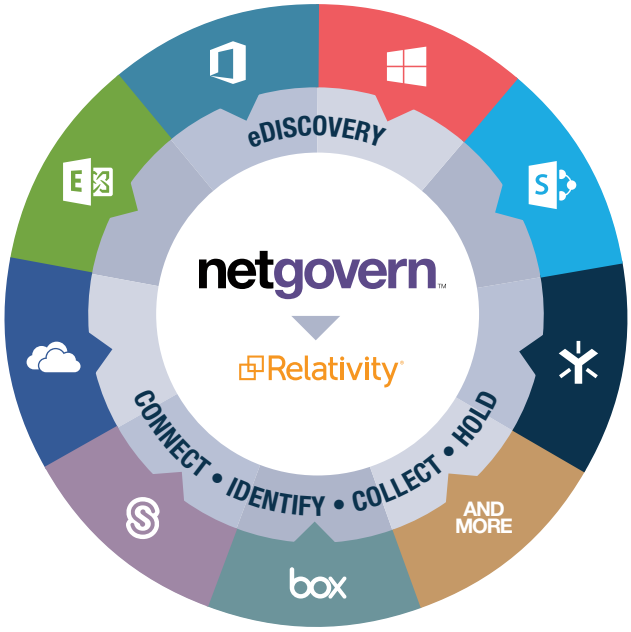
How Can You
Reduce Cost & Accelerate eDiscovery?

- Searching multiple locations in-place
- Reviewing before collecting
- Minimizing the size of legal holds

Searching Multiple Locations In-Place

NetGovern lets you perform in-place legal searches for relevant content in any cloud or on-premise locations to ensure regulatory or governmental compliance, or in response to litigation. With the tool's advanced filtering capabilities, perform interactive searches, search within searches, create multiple cases, and reduce data sets. Through a single pane of glass, review, preview files, and collaborate. Content identified as relevant can be put under legal hold, exported, or imported to Relativity.



Review Before You Collect

NetGovern Smart Collection connects to all of your unstructured data locations and maintains an up-to-date index of the information they contain, empowering you to identify what you need in seconds —before any data is ever collected. Enable your Inside Legal Counsel to minimize response time by providing immediate access to ESI to fast-track pre-collection and importing only relevant data to Relativity for Outside Counsel to review.

Reduce Data **Under Legal Hold**

Reduce costs associated with preservation and collection processes, and eliminate the risk of spoliation with our in-place legal hold add-on. Apply intelligent legal hold policies exclusively to data identified as relevant to ensure the authenticity, immutability, and defensibility of the minimized data set. Track data throughout the entire litigation lifecycle with a complete audit trail and crystal clear visibility into the review process.

LET'S TALK ABOUT IT

About **NetGovern**

NetGovern's information archiving and governance software helps mid-sized organizations solve data compliance, safeguard personal information, simplify eDiscovery and protect their reputation. Our all-in-one solution offers the fastest speed to value, lowest cost of ownership, and most secure visibility of sensitive information found in messages and files, independent of the storage location.
