

## SOLUTION OVERVIEW

# RedactSmart™

Automated Redaction Assistant

### Lowens the cost of redactions

Reduces the need for manual redactions, completes hundreds of redactions in minutes.

### Maintains efficiency

Fully integrates into Relativity and works with most review workflows.

### Protects business and privileged data

Allows users to easily identify and redact confidential or privileged information.

### Lowens risk of inconsistency

Helps prevent inconsistent redactions drawn by multiple reviewers.

Through the use of its proprietary **SmartSeries™** offerings, Lighthouse eDiscovery cuts clients' ediscovery costs by reducing the volume of data subject to review and automating workflows to make the review of relevant and privileged data more efficient. RedactSmart enhances the SmartSeries by increasing the speed and consistency with which redactions are applied across a matter.

**RedactSmart can save you up to \$250,000** on a 500,000-document matter with a heavy redaction load.

Using RedactSmart, a client was able to draw and QC **867 redactions in less than an hour.**

## What challenges does it address?

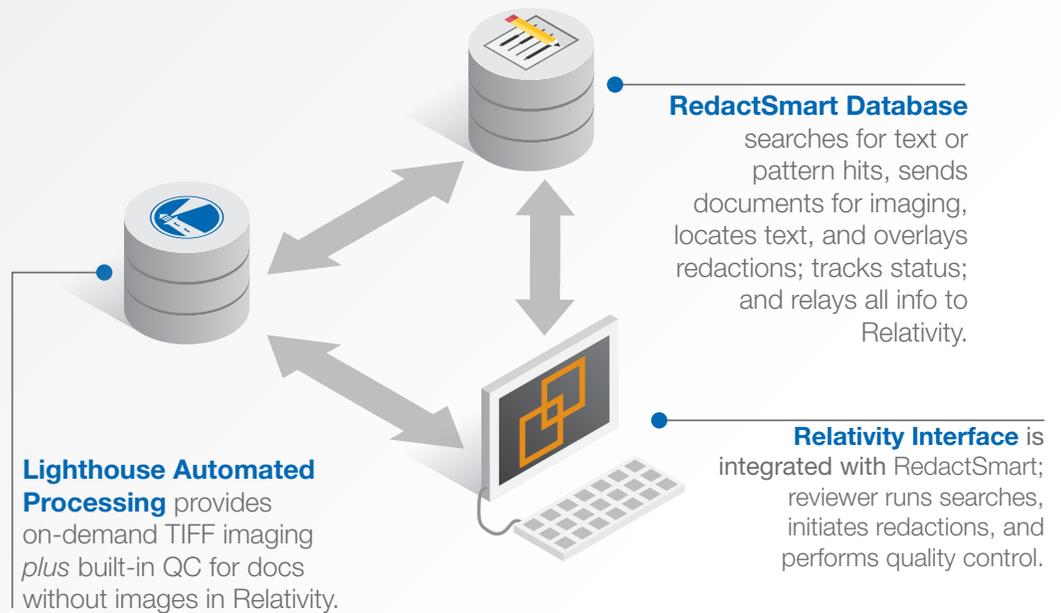

In cases involving large amounts of personal or confidential business data—such as those in the pharmaceuticals, financial services, or government sectors—or cases containing privileged material, the burden of redactions can be a huge headache. Typically, legal teams apply redactions manually by using software to draw boxes on TIFF images. Manual redactions are commonly applied by a number of different reviewers, making the redactions inconsistent and error-prone. This inconsistency can lead to waiving privilege and exposing confidential business or personal information. Even the most sophisticated review tools that allow for automated redactions are unworkable in practice because they require pre-imaging and do not have flexible workflows.

RedactSmart, a patent-pending Relativity-based solution, addresses these challenges by enabling reviewers to search and redact words, phrases, sentences, or other blocks of data—not just in one document, but across the matter.

RedactSmart also supports searching and redaction of social security numbers, phone numbers, credit card numbers, or other sensitive information that follows a programmable pattern. RedactSmart is very flexible and easily integrates into most review workflows.

### Other features of RedactSmart include:

- Customizable redaction text.
- A dashboard for monitoring and QCing redactions.
- Real-time redaction status from the document view.
- Ability to modify redactions.
- Bulk or single redaction deletion capability.
- A full audit trail within Relativity's document history.
- No need to image documents before the redaction request.

## What is the benefit to you?

Consistent and cost-effective redactions across your matter using a familiar review tool. RedactSmart is unique in that it fully integrates with Relativity and allows users to search and redact documents during native review without incurring the database load, time, and expense of first converting them to TIFF images. It also allows you to avoid much of the cost and inconsistency of manual redactions.

Another example of Lighthouse reducing the cost and improving the efficiency of review, RedactSmart is the easiest and most accurate method of applying redactions within the Relativity review environment. This and other examples of efficient and effective workflow, process, and reporting are available through Lighthouse eDiscovery's SmartSeries.

## About Lighthouse

Lighthouse eDiscovery guides clients through every aspect of ediscovery, from the simplest projects to the most complex, risky matters. Our experienced, dedicated client teams deliver with high velocity, unparalleled quality, and a pragmatic focus on lowering overall ediscovery costs. We develop highly innovative applications built on leading third-party technology, making it more effective and easier to use, and we custom-engineer solutions to specific client requirements. Our client-aligned approach has enabled us to form long-term relationships with many of the world's leading corporations and top law firms who rely on Lighthouse to meet all of their ediscovery needs.
