

RelativityOne for Investigations with Slack

RelativityOne transforms error-prone and labor-intensive Slack investigations with a lightweight workflow and heavy-hitting functionality to give you the entire story without delay.

Kick off your Slack investigation with one click

Bring targeted Slack data into RelativityOne with a single click without ever leaving the safety and security of the cloud. Every collection comes with a definitive audit trail, ensuring a defensible process every time.

Easily produce a timeline for your counsel

RelativityOne's Case Dynamics helps you build and track a case with the ability to mark key aspects of conversations as "facts". Export detailed timelines and send it to your counsel.

Say goodbye to JSON files and hello to reviewing in Slack's native format

RelativityOne enables you to see your data exactly the way it looked when it all went down, with all the nuances of a native chat application—including emojis, reactions, and deletions.

Get to the conversations of interest – fast

Investigate employee behavior of interest including potential IP loss, impending departures, and presence of PHI in channels where it doesn't belong. RelativityOne search templates allow you to flag social security numbers, dates of birth, and more. Create customized searches to find information specific to your organization such as account numbers, medical providers, or health conditions.

This screenshot shows the RelativityOne platform integrated with Slack. At the top, there's a search bar and navigation tabs for 'Native', 'Image', 'Extracted Text', 'No Production', and 'PDF'. Below the search bar, a sidebar titled 'Persistent Highlight Sets' lists recent searches like 'Default', 'rumors', and 'I'll text you'. The main area displays a list of messages from users Cheryl Nelson and Sara Shackleton. The messages include text snippets and attachments, such as a marketing_draft.docx file. A footer at the bottom right says 'View Similar Documents'.

This screenshot shows the RelativityOne interface for a specific investigation. It includes a timeline chart, a pie chart of key terms, and a list of messages. The message list shows several emails from a user named 'meyers.albert' to 'Cheryl Nelson' and 'Sara Shackleton' with subject lines like 'RE: Please review the attached report' and 'RE: How are we doing'. The interface has various filters and search tools at the top.

Unlock the full picture in one platform

Uncover the employees behind PHI Slacks and how frequent PHI shows up in conversations through interactive RelativityOne dashboards. RelativityOne also enables you to easily record notes on the facts, people, and dates of relevant messages to build timelines and reports all in one place. Plus, you can locate compressed files, messages with hidden content, files that were printed and more with the push of a button.

Power investigations, compliance, and legal operations in a single tool

RelativityOne can be your one stop shop for day-to-day compliance monitoring, internal investigations, and preparing for potential litigation. Use Relativity Trace to proactively monitor Slack and other correspondence and provide alerts based on customized triggers. Automatically redact sensitive information and produce documents in response to subpoenas, compliance audits, or pending litigation using RelativityOne production tools.

This screenshot shows the RelativityOne interface displaying a list of messages from users Cheryl Nelson and Sara Shackleton. The messages are presented in chronological order. Several messages contain redacted content, indicated by large black boxes. The interface includes standard document viewing tools like zoom, search, and print at the top.
