CDS Vision

CDS VISION ™

CDS Vision™ is a proprietary set of filters, workflows, and technology, that leverages the full power of Relativity One guided by the expertise of the CDS Professional Services Team:

- *Quickly organize, classify, and prioritize relevant document sets for review*
- *Cull out a significant percentage of non-responsive documents*
- *Visualize key concepts and communication networks*
- *Identify potentially privileged documents and PHI/PII within data sets*
- *View a detailed coding "Scoreboard" for real time coding decision tracking and conflicts resolution*
- *Track data from source media to production*
- *Leverage advanced analytics and machine learning to streamline and prioritize review*

Vision: First Look

The CDS Vision *First Look* dashboard is a one-stop shop for all the vital information contained within initial processing sets. First Look allows users to quickly identify and address problematic data sets, missing date ranges, corrupt or password protected files and non-standard file types that require additional consideration. CDS has taken its standard data reporting to the next level by allowing users to visualize, interact and act on data upon ingestion.

Vision: Communication Analysis

CDS Vision Communications Analysis allows users to visualize and identify important concepts along with the communication patterns within data sets surrounding those concepts. Communications Analysis can be leveraged to identify key custodians, build more targeted search terms, remove noise, and streamline review. The CDS Professional Services Team can help users make the most powerful Communication Visualizations.

Vision: Data Intelligence

Vision: Data Intelligence leverages advanced algorithms, pre-defined filters, and best practice workflows to create a repeatable streamlined process for evaluating data. Data visualizations help organize and prioritize segments of document sets that may require special attention.

- Identify Potentially Privileged Documents
- Eliminate Non-Responsive Data
- Protect Personal Information

Vision: Scoreboard

Always know the score with the CDS Vision Scoreboard, providing real time metrics and visualizations of review coding decisions and progress. Each Scoreboard is customized to display the unique coding criteria of user matters. Quickly measure review efficiency and prepare documents for production.
