

Agility Blue® for eDiscovery Teams

Keep eDiscovery work moving—from initial requests to reporting.

Agility Blue brings projects, deadlines, team communications, and operational reporting into one platform built for eDiscovery teams.

See what needs attention

Track deadlines, assignments, and work in progress with dynamic dashboards.

Standardize how work gets done

Use custom forms, templates, and automations to manage repeatable workflows. Keep volumes, evidence, and billing information together.

Keep communications with the work

Capture requests, comments, notes, and events alongside the projects they support.

Understand team performance

Use reporting to examine your team's workload and performance.

Connect your operations

Connect with billing, matter management, and review applications through Agility Blue's API.

Agility Blue Relativity® Integration

Bring Relativity metrics into your operational workflow.

Connect Relativity workspace metrics to Agility Blue to view current usage, report on trends, and automate billing processes. The integration supports multiple Relativity instances and is compatible with Relativity aiR.

Connect multiple instances

Track user and workspace metrics from multiple Relativity instances in Agility Blue.

Track Relativity usage trends

View current metrics and generate reports on historical trends.

Automate billing processes

Use the AB Automation Scripting Kit to automate Relativity billing and other processes.
