

Everything You Need to Know

Our annual legal data and technology conference, RelFest Chicago, brings together a vibrant community of legal professionals for a week of hands-on learning and connection – but it's so much more than that.

At RelFest Chicago you can dig deep into all things legal intelligence. With a full agenda of sessions and product experiences, there are learning opportunities for all kinds of roles and teams. This is also your chance to make the most of being in the room – try our generative AI solutions, have inspiring conversations with legal peers, and see what's new and what's coming from the Relativity team.

Why Attend?

Education & Inspiration

RelFest Chicago is a meeting of the best minds in legal. Explore the challenges facing the industry and the solutions needed to solve them. Engage in conversations on generative and agentic AI, Legal Data Intelligence, data privacy, and more – and leave with practical takeaways for your team.

Connection & Celebration

RelFest is all about the people. This is your opportunity to meet with industry leaders, swap stories with peers, and connect with Relativity's leadership and product teams. Keep the connection going at our legendary RelFest networking event – where we pull out all the stops to celebrate this community.

Bragging Rights

Attendees talk about RelFest long after the event is over. Don't risk the FOMO – join us for what's sure to be an amazing experience. Take it from our past attendees:

“At RelFest, I wasn't just learning. I was part of the conversation. I tested new technology, saw how it applies directly to my daily work, and met so many of the clients I support every day. Hearing how happy they are with the work we do made me even more grateful for what I get to be part of.”

“This conference has been instrumental in my career growth, opening doors for opportunities in the legal intelligence world, and I couldn't be more grateful to be here.”

“What an absolutely inspiring few days in Chicago! The central takeaway was the clear, responsible, and rapid integration of generative AI like Relativity aiR into e-discovery and Legal Data Intelligence. We saw innovative, defensible solutions that are set to redefine our strategic processes and operational workflows – proving that the future of legal tech is truly here.”
